Profile

Programming Technician (UTN) and developer in training with a solid foundation in web development and programming logic.

I am interested in participating in projects that combine creativity and technology, contributing practical and efficient solutions.

I am looking for my first job opportunity in the IT sector to continue learning and to contribute commitment, responsibility, and enthusiasm.

Highlighted Projects

Gastronomic Management Mobile Application: I participated in the group development of key modules in a mobile

app designed to optimize the operational workflow of a restaurant. I automated order taking and the communication between the kitchen, the bar, and the dining area, reducing waiting times through real-time push notifications.

I implemented geolocation (Maps API) for delivery and QR reading for access/menu.

I developed statistical dashboards and automatic generation of reports and PDF billing.

Self-service game purchase system (Full Stack): Node.js, Express, Sequelize, MySQL, EJS, Cloudinary, Render | Frontend: HTML, CSS, JS, Bootstrap, SweetAlert2 | Features: cart, ticket, admin panel

Skills and Tools

- Full stack web development (frontend and backend)
- Database design and maintenance
- Teamwork and version control with Git / GitHub
- Implementation of solutions in collaborative environments
- Continuous learning and problem solving

(Technical knowledge in HTML, CSS, JavaScript, Angular, Node.js, Python, MySQL, MongoDB.)
